► Logistical Preparedness

Features

Online ordering of
supply cage items

Built-in reporting

Online inventory
management

Improves efficiency

Reduces inventory
loss

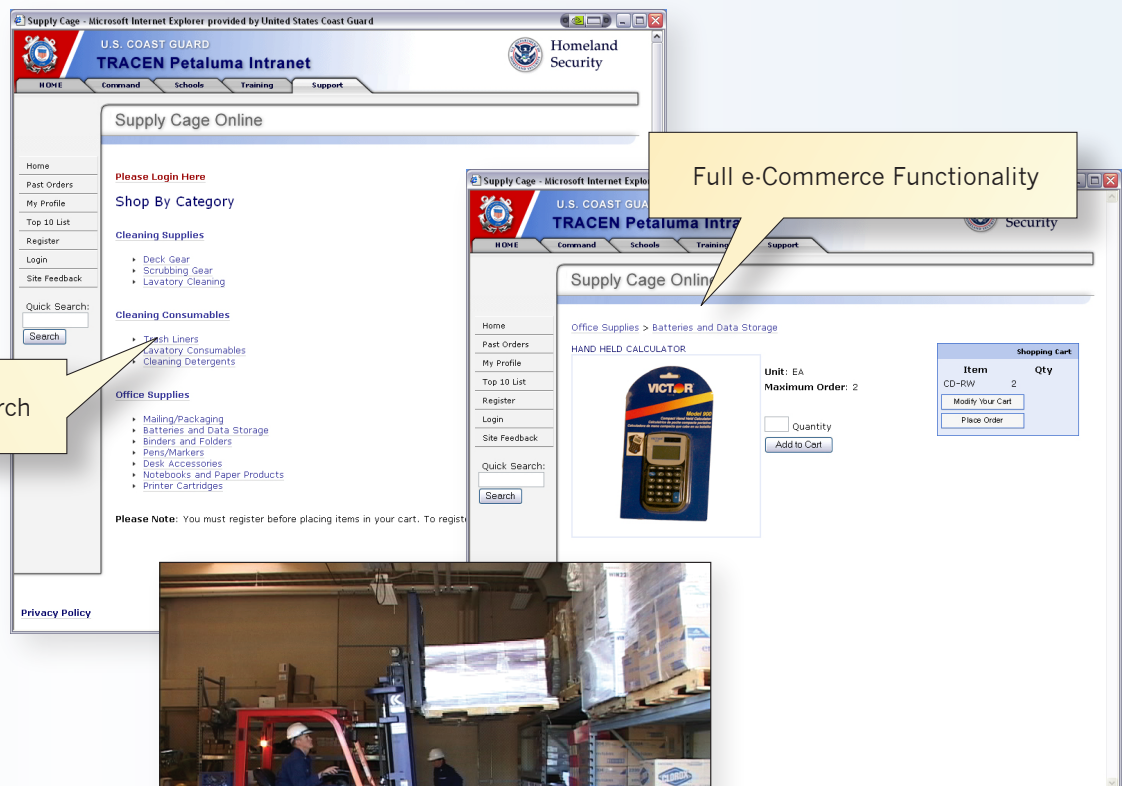

Coast Guard Storekeepers are the unsung heroes behind the scenes of organizational preparedness, making sure that everyone has what they need to succeed.

In 2006, Coast Guard Training Center (TRACEN) Petaluma went to an online automated supply system to take supply orders and track inventory.

With the built-in inventory tracking, the web site enables Storekeepers to better manage inventory and considerably reduce inventory loss. The system has greatly improved customer communications and satisfaction while dramatically decreasing the amount of time Storekeepers spend managing supply cage inventory.

With this new system, TRACEN Storekeepers are better able to fill orders, maintain inventory, and keep personnel prepared for their mission.
